PANELIST

9:30 - 10:05 am

Federal leaders will join States and providers as they talk about the importance of framework harmonization from our nation's capital to Main Street. While we often think of framework disharmonization as an issue that applies to the rules and regs that flow from the federal level to states and local governments, the reality for providers is that framework dis-harmonization exists at similar disparities between states and local jurisdictions. Hear important updates on the work of the StateRAMP CJIS Task Force and recommendations to help streamline compliance.

“Begin as you mean to go” is a reminder that the choices we make today become our legacy in the long-term. Procurement is where it starts for defining the relationship between public and private sectors. The requirements we set today define how we will work together and that includes cyber security and risk management. This session will focus on shared best practices for procurement, leveraging enterprise architecture standards, and a deeper understanding of the role procurement plays in protecting our citizens.

2:25 - 2:50 pm

Break for Refreshments and Vendor Exhibits

2:50 - 3:15 pm

Keynote: Remembering our Why—The Story of a Real-World Cyber Attack

Jim Corns

SPEAKER

Hear the harrowing details from the leader who managed the attack and what they learned from the experience. Protecting our citizens and way of life requires public sector leaders and industry to come together in this mission. We invite you to hear this story as it serves as a reminder for each of us: to remember our why.
